INTERIORS NEWS:

CHRISTMAS AT HOME

Christmas has become fashionable, explains *Dawn Sandoval* and interior-istas are busy hunting down the perfect decorations to create the perfect Christmas look

DESIGNER FOCUS: Joseph Joseph

Talented twin brothers, Antony and Richard Joseph, launched Joseph Joseph in 2003. The brothers came together from different backgrounds (Antony studied design at Central St. Martin's while Richard did a business degree at Cambridge University) and, coupled with a family history of glass production stretching back three generations, have built a successful, rapidly growing business.

Specialising in kitchen and tableware products, their trademark (and award-winning) glass worktop savers are what you may know them for. Manufactured in Britain, from toughened glass that holds a lifetime guarantee against breakage, they are dishwasher safe, provide a hygienic, odourless, stain resistant food preparation surface and are heat resistant up to 280°C.

Joseph Joseph's offering now includes kitchen storage, stylish clocks and an innovative chopping-board collection, stocked in numerous UK retailers and now sold in forty countries across the world. With one Joseph the business brain and the other the designer, combined they are a recipe for success.
